

Ulead DVD MovieFactory® 5

The Easy Way to Create Video and Slideshow Discs

What's New

Ulead DVD MovieFactory® 5 is easy-to-use disc authoring and burning software for today's digital lifestyle. Turn your standard or HD video and photos into DVDs with studio-quality personalized menus. Quickly trim and enhance video, and remove commercials from recorded TV programs. Share and preserve your precious memories on CD, DVD, or HD DVD.

Easy and Fast Access to All Tools

New Launcher

- The elegant new launcher is your doorway to the world of disc burning.
- From one clear, simple interface, select any task.
- The software will guide you through all the steps necessary for a perfect disc, every time.

Intuitive Quick-Drop

- Simply put a blank disc in the burner, and drag any file or folder into the desktop icon.
- Creates music or data CDs or DVDs, according to your preference.
- Check disc behavior with Smart Preview and display burning progress.

PureHD™ - High Definition Quality

- **PureHD™ Capture** - Seamlessly capture from the latest high-definition video camcorders, such as the Sony HDR-HC1.
- **HD DVD authoring** - Collect your high-definition or standard definition video, and create HD discs with professional menus.
- **Blu-ray Data burning** - Back up your data on 25Gb Blu-ray Discs.

New Capturing and Editing Options

Enhanced Capture

- **HDTV Capture** from any HD source - cable, satellite or broadcast.
- **DBV-T or ATSC (US)** digital transmissions supported, in standard or high-definition.
- **Delay Recording** records your programs while you're away.

More Video Tools

- **Video Editing Toolbox** - do basic video editing tasks with ease: add titles and background music, mix the audio levels, and auto-add transitions at cut points.
- **Video join** lets you join two or more videos so that they play seamlessly without interruption.
- **Video auto-enhance** - with one click, you can fix the most common video problems with brightness and contrast.

Enhanced Multi-Trim Functions

- **AccuCut** - Search and trim any video you don't want. Find the piece you want to remove, then zoom in on the timeline to see the exact in and out frames where you want to cut.
- **Ad-Zapper** - for uninterrupted viewing of your favorite TV shows, you can remove all the commercials before burning your collection to disc. Ad-Zapper will automatically detect the ads and prompt you to remove them.

New Authoring Features

Advanced Menu Authoring

- **All-new menu templates** give polish to your production. Select from motion menus, still menus or menus with Flash overlays, and modify as you wish.
- **SmartScene Menus** – Unique menus where project titles share a single preview area, rather than appearing as separate motion buttons.
- **Text menus** – Slick-looking menus with text that act as buttons.
- **Loop cue menus** – a menu can start, play a short piece first, and then loop from a set point.
- **Menu transitions** – at last, you can create transitions just like Hollywood DVDs. Set menu-in and menu-out transitions to smooth over going into the next title or menu. A total of 33 transition effects are available.
- **Motion Overlays** are Flash overlays that give a great sense of motion to your menus, independent of the background.
- **Rotatable text** can be rotated to any angle for more eye-catching menus.
- **Motion filter** will create movement even on a static menu. Select an image for a background, then animate it with ripples, spotlight effects or pan and zooms to bring it to life.
- **MPEG.Now Dual Core Rendering**– get faster Smart Render times with dual core or dual-CPU machines.

Better Photo Slideshows

- **HD Slideshow** lets you use your hi-res digital camera images at their full quality, creating high-definition slideshows that pop right off the screen.
- **ExpressFix™** walks you through the simple steps for fixing common digital photo problems such as red-eye, too-dark or too-bright exposure, color cast, and more.
- **Photo Explorer 8.5** browser included free! Organize and find your photos and videos fast.

New Audio and Data Options

More Music and Data

- **Burn** data, pictures or documents to Blu-ray Disc. Also supports single- and double-layer DVDs.
- **MP3 discs** provide many hours of uninterrupted MP3 music on a CD or DVD.
